Summary

Experienced Software Engineer specializing in software solutions for business.

Technical Skills

- **Programming Languages**: Ruby, JavaScript, HTML, CSS, SQL
- **Libraries & Frameworks**: Ruby on Rails, RSpec, Minitest, React, Ember.js, Git, Docker
- Proficient in a variety of programming aspects, such as design patterns, version control, code documentation, code reviews, test-driven development, continuous integration, continuous delivery and agile project management.

Experience

- **Localistico** — Remote
  Software Engineer — *May 2019 - ...*
  - **Localistico.com**: Currently working on the backend for an app used by brands like Orange and Starbucks to manage and track how their locations look across different mapping and platforms, from Google Maps to Yelp. Built features like extended attributes for Google My Business or roles & permissions. Experience with fast-paced, high intensity environments.
    Stack: Ruby, Ruby on Rails, PostgreSQL, Minitest, Heroku, Docker

- **Self-employed** — Remote
  Software Engineer — *Jan 2016 - Apr 2019*
  - **Getbuzz.io**: Developed a Ruby on Rails backend as well as a frontend using Ember.js JavaScript framework. Took ownership of the codebase and successfully designed and developed diverse features such as: multi-author blogging feature, invite feature for various social networks, connect feature for software users, a payments feature, design of database models and queries, a Docker-based deployment environment, as well as frontend JavaScript components.
    Stack: Ruby, Ruby on Rails, JavaScript, Ember.js, HTML, CSS, PostgreSQL, RSpec, CircleCI, AWS, Docker

- **Codahead** — Kraków, Poland
  Software Engineer — *Apr 2013 - Dec 2015*
  - **Spinlister.com**: Peer-to-peer bike rental platform. Involved in improving testability, refactoring and maintenance of legacy code. Worked with international teams.
    Stack: Ruby, Ruby on Rails, JavaScript, Backbone.js, HTML, CSS, PostgreSQL, RSpec, CircleCI, Heroku
  - **Listables.com**: Ember.js frontend for a web application used for collaboratively creating, sharing and tracking checklists.
    Stack: JavaScript, Ember.js, HTML, CSS, Apache Cordova
  - **Appetizeapp.com**: Point of Sale & Ordering Solutions. Involved in features such as integration with external systems, as well as bug fixing.
    Stack: PHP, JavaScript, HTML, CSS, MySQL

Education

- **Tadeusz Kościuszko Cracow University of Technology** — Kraków, Poland
  Master of Science in Applied Computer Science — *2011 – 2013*
- **AGH University of Science and Technology** — Kraków, Poland
  Bachelor of Science in Computer Science and Econometrics — *2008 – 2011*

Personal Projects

- **Najnowsze.xyz**: A lightweight, serverless Wykop client.
- **Aboutme GraphQL API**: Serverless microservice on AWS Lambda providing information about recently played track from Spotify, posts from Instagram, distance jogged from Endomondo, etc.
